WEEKLY SCRUM

September 21 - September 25, 2020

Monday - September 21st

1. *What did you do yesterday?*
 - N/A
2. *What are you doing today?*
 - Group meeting after class, discussed roles. I will be the scrum master.
3. *Blockers/notes?*
 - Another group meeting on Wednesday.

Tuesday - September 22nd

1. *What did you do yesterday?*
 - Group meeting about roles.
2. *What are you doing today?*
 - Research agile scrum programs that best suited for our group.
3. *Blockers/notes?*
 - N/A

Wednesday - September 23rd

1. *What did you do yesterday?*
 - Researched agile scrum programs.
2. *What are you doing today?*
 - Group meeting after class. Get familiar with Jira Software and start creating first sprint.
3. *Blockers/notes?*
 - N/A

Thursday - September 24th

1. *What did you do yesterday?*
 - Played around with Jira and GitLab as my role is Scrum Master.
2. *What are you doing today?*
 - Complete scrum agile sprint for project 2 and research the product and its' tools needed.
3. *Blockers/notes?*
 - Owner of GitLab needs to add token key for Jira and GitLab integration, or just use the basic GitLab features for scrum agile.

Friday - September 25th

1. *What did you do yesterday?*
 - N/A
2. *What are you doing today?*
 - N/A
3. *Blockers/notes?*
 - N/A

WEEKLY QUESTIONS

September 21 - September 25, 2020

Lesson 7:

1. From what you submitted for project 1, would you pursue and make it a full product? How and why?
 - Yes, I think I would because it's something I could of used for this semester and probably will need it for the following.
 - How, by working really hard and trying to recruit some fellow students that is as hard working as I am and then maybe with a prototype, we can get some funding to get it into production.
 - Why, I feel like it's a useful application that all students can use.

Lesson 8:

1. What was your first research spike and explain how you approached it?
 - Official research spike would be MomentAR the application itself and then the users of this application.
 - I watched your demo of how the application is suppose to be used and discussed with my team regarding how the app can detect the users emotion. It was not easy since none of us have any experience with children in need of special care. There is a lot of psychology in this app and this is a new field we all need to research carefully.
