Nobel Prizes for Women

Women in Mathematics, Science & Engineering

PROFESSOR TOVAR

PHILIP D. KIM

ID: 108508736

SEPTEMBER 16, 2020

The percentage of Nobel Prizes winners in science have historically been geared more towards men. As such, some have called for the various Nobel committees to instill quotas ensuring a certain percentage of women to receive the prize. Take a position on this proposition and explain in 2–3 pages (double spaced) why you do or do not think the Nobel Prize should implement quotas to improve the gender balance.

Introduction [PC05] The percentage of Nobel Prizes winners in science have historically been geared more towards men. As such, some have called for the various Nobel committees to instill quotas ensuring a certain percentage of women to receive the prize. Take a position on this proposition and explain in 2–3 pages (double spaced) why you do or do not think the Nobel Prize should implement quotas to improve the gender balance.

Body [PC05] The percentage of Nobel Prizes winners in science have historically been geared more towards men. As such, some have called for the various Nobel committees to instill quotas ensuring a certain percentage of women to receive the prize. Take a position on this proposition and explain in 2–3 pages (double spaced) why you do or do not think the Nobel Prize should implement quotas to improve the gender balance.

Conclusion [PC05] The percentage of Nobel Prizes winners in science have historically been geared more towards men. As such, some have called for the various Nobel committees to instill quotas ensuring a certain percentage of women to receive the prize. Take a position on this proposition and explain in 2–3 pages (double spaced) why you do or do not think the Nobel Prize should implement quotas to improve the gender balance.
